BOOK SYNOPSIS

A complete guide to the management and restoration of water in karst environments. Written by the co-chair of the Karst Commission of the International Association of Hydrogeologists, this book addresses the unique challenges related to the characterization, management, and protection of karst aquifers, which are present on all continents and numerous oceanic islands. *Water in Karst* describes karst hydrogeology and hydrology, surface water-groundwater interactions, site investigation, data collection, delineation of drainage areas, groundwater extraction, regulatory issues, and water vulnerability and restoration. Predictive modeling methods and solutions to resource contamination and overexploitation are included. Photos, diagrams, and an eight-page color insert illustrate the concepts presented in this practical, comprehensive reference. **WATER IN KARST COVERS:** Karst aquifers, Flow measurements and analysis, Drainage areas in karst, General principles of water management, Regulations and education, Predictive models, Floods, droughts, and climate change, Groundwater extraction, Engineering regulation of karst aquifers and springs, Vulnerability of water in karst, Restoration of water in karst.
